

## **Trout Headwaters, Inc.**

"We called on Kemp West and their spyder to help with a recent stream restoration project in Colorado.

With the unique abilities of the spyder and the professionalism of the operator, we were able to complete our project ahead of schedule and with virtually no evidence of having used heavy equipment on this environmentally-sensitive site.

In the end, the spyder saved us time, hassle and money. The spyder is one great machine!"

~ Michael C. Sprague
